Createspace Independent Publishing Platform, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Microsoft s Text Template Transformation Toolkit (usually referred to as T4) is a template based text generation framework included with Visual Studio. T4 source files are usually denoted by the file extension . tt. T4 is used by developers as part of an application or tool framework to automate the creation of text files with a variety of parameters. These text files can ultimately be any text format, such as code (for example C#), XML, HTML or XAML. T4 uses a custom template format which can contain code and string literals in it, this is parsed by the T4 command line tool into code, compiled and executed. The output of the executed code is the text file generated by the template. T4 can also be completely run within the applications via the use of the TextTransformation class which eliminates the need for the end user to have Visual Studio installed. T4 is used within Microsoft in ASP MVC for the creation of the views and controllers, ADO Entity Framework for entity generation, and ASP Dynamic Data. It is also used outside of Microsoft in projects such as SubSonic This updated and expanded second edition of Book provides a user-friendly introduction to the subject, Taking a clear structural framework, it guides the reader through the subject s core elements. A flowing writing style combines with the use of illustrations and diagrams throughout the text to ensure the reader understands even the most complex of concepts. This succinct and enlightening overview is a required reading for all those interested in the subject . We hope you find this book useful in shaping your future career Business.
