

## Dark Matter in Astro- and Particle Physics

Filesize: 7.11 MB

### **Reviews**

*Comprehensive manual for ebook fans. I am quite late in start reading this one, but better then never. Its been written in an exceptionally basic way and is particularly merely soon after i finished reading this publication in which really changed me, affect the way in my opinion.*

*(Prof. Antone Olson II)*

## DARK MATTER IN ASTRO- AND PARTICLE PHYSICS

To download **Dark Matter in Astro- and Particle Physics** PDF, you should access the web link listed below and save the document or have accessibility to other information that are have conjunction with DARK MATTER IN ASTRO- AND PARTICLE PHYSICS book.

Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of the International Conference DARK 2000 Heidelberg, Germany, 10 14 July 2000 | Dark matter in the Universe has become one of the most exciting and central fields of astrophysics, particle physics and cosmology. The lectures and talks in this book emphasize the experimental and theoretical status and perspectives of the ongoing search for dark matter, and the future potential of the field into the next millennium, stressing in particular the interplay between astro- and particle physics. | I Astronomical Evidence for Dark Matter.- Large-Scale Structure and Dark Matter Problem.- The Distribution of Dark Matter in Galaxies: Constant-Density Dark Halos Envelop the Stellar Disks.- The Amount of Dark Matter in Spiral Galaxies.- Measuring Stellar and Dark Mass Fractions in Spiral Galaxies.- Dark Matter Caustics.- Constraints on White Dwarfs as Galactic Halo Dark Matter.- Contribution to Dark Matter from Extragalactic Dust.- Astrophysical Axion Bounds.- The Sloan Digital Sky Survey at the Millennium.- X-Ray Measurements of the Dark Matter Content of Galaxy Clusters.- Can Dark Matter See Itself?.- Self-Interacting Cold Dark Matter Halos.- II Cosmology and the Early Universe.- Evidence for Dark Energy from a Study of Type Ia Supernovae.- On the Mystery of the Cosmic Vacuum Energy Density.- Can Quintessence Be Natural?.- Preheating, Thermalization and Supergravity.- Dark Energy in Extra Dimensions and String Theory: Consistency Conditions.- Models of Inflation, Supersymmetry Breaking and Observational Constraints.- Big Bang Nucleosynthesis and Related Observations.- Big Bang Nucleosynthesis in the Precision Era.- III Beyond the Standard Model.- Testing a (Stringy) Model of Quantum Gravity.- Particles in the Bulk: A Higher-Dimensional Approach to Neutrino and Axion Phenomenology.- Dark Matter in Supergravity.- Dark Matter in SUSY.- Collider Signatures of Sneutrino Cold Dark Matter.- Searching for Supersymmetric Dark Matter - the Directional Rate for Caustic Rings.- Primordial Black Holes as Dark Matter.-...
