Written by a Physicist with 20 years in Neuro-science Medical Research who has experienced numerous medically documented NDEs. The book describes in depth and detail the mysteries of quantum physics and its relationship with consciousness, the fact that we paint the universe into being, using the NDE to bridge the gap between infinite consciousness and this finite reality and provides for the first time a working definition for consciousness that satisfies all of the requirements in quantum physics and consequently every religion of man, in terms specifically accessible to the lay reader; and goes on to explain in detail how we do it, how we control time itself by our perception and awareness, how we manipulate the four forces of nature and infinite energy to paint the universe into being, and have done so since before the creation of this universe itself. The working definition in question simply requires consciousness to be unique and infinite in duration and scope, the evidence of this expressed in terms that challenges the scientific community to find an irrefutable counter argument, which is unlikely, leaving this finite universe to be infinitesimal, to the extent that it does not truly exist, merely an experience of perception that we ourselves define, an extension of ourselves, a construct. Modern mainstream physics has in some cases departed from this original view of the founders of quantum physics who expected future generations to find this working definition for consciousness in order to complete a model that describes a universe interdependent with us. These alternative views that attempt to eliminate consciousness from the equations are described in detail and an explanation in exacting terms where and why they...
